ABOUT

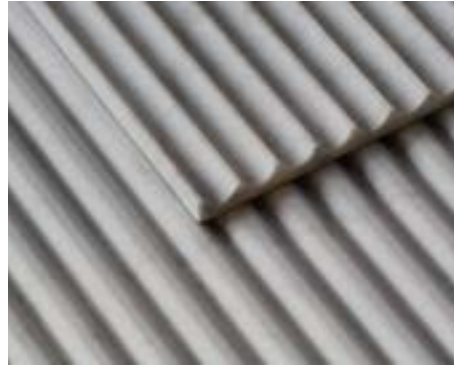

Landmark Stone is a family owned business that has been serving Sacramento, Lake Tahoe, and the Bay Area for many years. We take pride in serving hundreds of homeowners and companies every year.

Our experienced craftsmen cast an extensive selection of fireplaces, kitchen hoods, columns, balusters, moulding, and backyard décor. Many of our products are exclusive to Landmark Stone.

When you speak with one of our cast-stone professionals you'll hear the difference. Our experienced team has a good understanding of design principals, color, and texture. We will be happy to help you chose a product that matches your taste and brings your living space or office an extraordinary look.

With Landmark Stone, you can expect fast and friendly customer service, on-time delivery and a product that will bring charm, character and warmth to your living space or business for years to come.

The look of natural stone with the refined craftsmanship of cast stone

22 STONE TRANSITIONS

The authentic appeal of traditional masonry through a modern installation method

ARCHITECTURAL PRECAST

Introducing our Architectural Stone Collection: where artistry meets innovation. Inspired by centuries of architectural heritage, each piece is meticulously designed to elevate modern spaces with timeless elegance. From majestic columns to intricate moldings, our collection offers unparalleled versatility and durability. Experience the epitome of architectural refinement and transform your space into a masterpiece of timeless beauty.

TIMELESS CRAFT, STRUCTURAL ART

Architectural precast solutions present an economical advantage in their production, erection, and ongoing maintenance.

The most distinct benefit of architectural precast lies in its capacity to unlock virtually boundless design possibilities, offering unparalleled creative potential.

ULTRA HIGH PERFORMANCE CONCRETE

Landmark Stone introduces the light weight concrete panels for architectural application. These panels give the flexibility to be used both on interior and exterior walls for an endless possibility of creativity with architects, designers and builders. Landmark Stone panels are cast with our team of craftsman with the highest quality and attention to detail to provide a lasting product for years to come.

UHPC SPECIFICATIONS

Thickness: Standard is 1/2" thick (+/- 1/16" to 1/8" per unit)

Product Weight: 5.5lbs – 7lbs per cubic foot

Strength: GFRC – 16,000psi

UHPC – 22,000psi

Fire: Fire Resistant / Non Combustible Material

Moisture: *Water Absorbtion by weight: 3%-5%*

Water Vapor Permiabilitu: 0.25 – 0.35 x 10ft/s

Density: Dry 120 – 140 (PCF)

Tolerance: Per 6'

Fabrication – DIMENSIONAL – all directions +/- 1/16" to 1/8"

Warp / Bow – +/- 1/16" to 1/8"

Square / Skew / Diagnoal – +/- 1/16" to 1/8"

GLASS FIBER REINFORCED CONCRETE

Unlock the possibilities of modern design with our Glass Fiber Reinforced Concrete (GFRC) Collection. Combining the strength of concrete with the versatility of glass fibers, each piece of this collection offers unmatched durability and aesthetic appeal. From sleek countertops to intricate facades, GFRC opens doors to innovative architectural solutions. Explore the beauty of lightweight design and limitless creativity!

STRENGTH IN ELEGANCE

Glass fibers reinforce the concrete, much like steel does in conventional concrete. The glass fiber results in a product with much higher flexural and tensile strength than normal concrete, allowing its use in thin-wall casting applications. GFRC is a lightweight, durable material that can be cast with lasting durability and strength.

GFRC SPECIFICATIONS

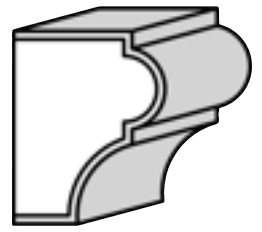

Weight: +/- 7-8 (lbs/ft²) @ 3/4"

Compressive Strength: minimum 7000-psi strength, at 28-day cure

[test avg > 9000-psi]

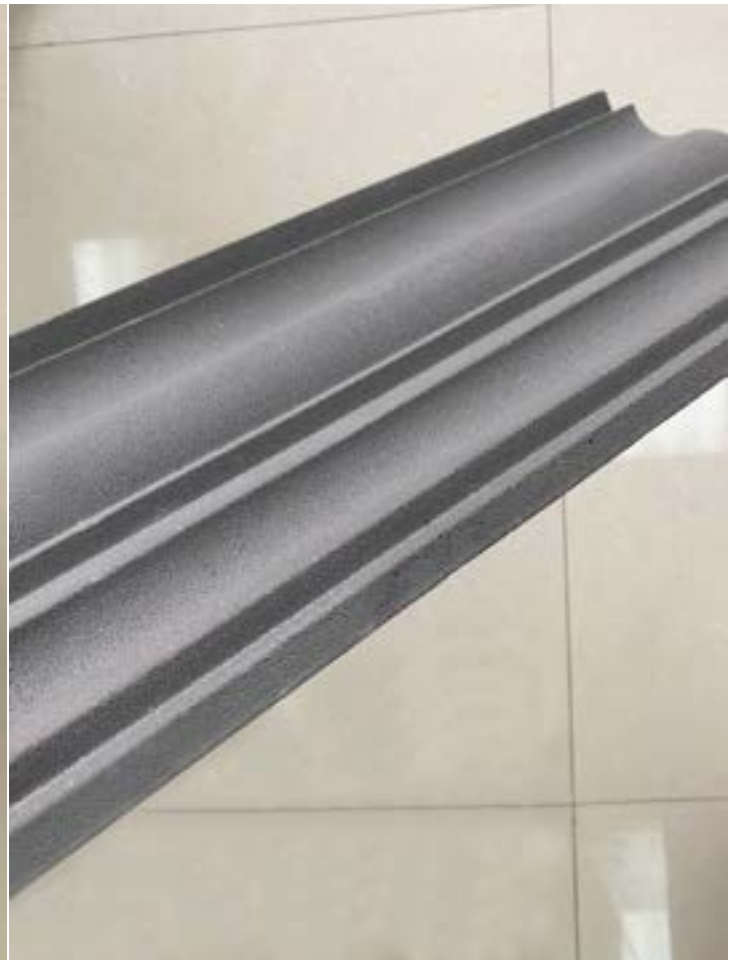

Absorption: 3-5% maximum, tested per ASTM C-1195

Weather Resistance: No significant loss in strength or change in appearance after 200 hours accelerated weathering conducted in accordance with ASTM C 67

LIMELIGHT - LIGHTWEIGHT STONE

Step into the Limelight with our Lightweight Stone Collection, where innovation meets aesthetics. Engineered for modern versatility, each piece boasts the natural beauty of stone with the added advantage of lightweight construction. Our Limelight Collection offers endless design possibilities without compromising on durability or style. Illuminate your space with the beauty of lightweight stone and redefine architectural possibilities with ease.

FEATHER-LIGHT BEAUTY

A revolutionary progress in the architectural facade world has been made. By utilizing the lightweight properties of EPS foam and combining it with natural stone aggregates, we create lightweight limestone-look elements that can enhance any residential or commercial property. One significant advantage of this lightweight material is that it eliminates the need for over-engineering projects. Installation is quicker and safer, reducing the risk of injury to installers. Our state-of-the-art process ensures crisp corners, giving the appearance of natural stone.

3D RIBBED PANELS COLLECTION

Introducing our 3D Ribbed Panels: where texture meets innovation. Designed to add depth and dimension to any space, each panel features intricate ribbing for a visually striking effect. Whether used as wall cladding or architectural accents, our 3D Ribbed Panels offer a modern aesthetic with a touch of sculptural elegance. Elevate your design with dynamic texture and create a captivating environment that leaves a lasting impression.

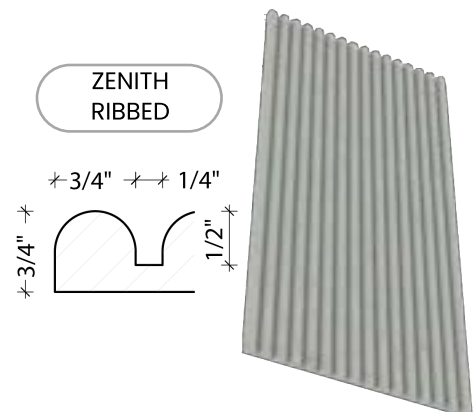

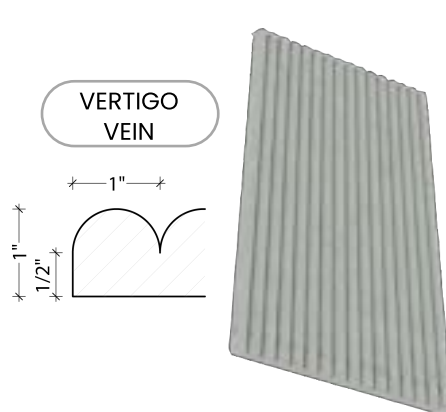

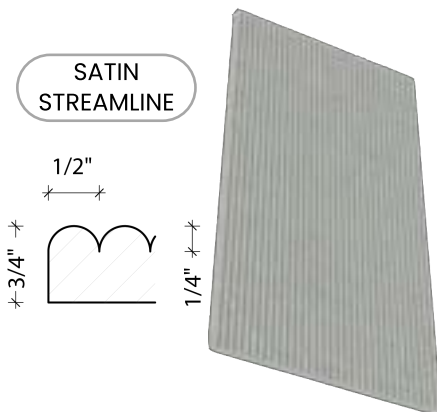

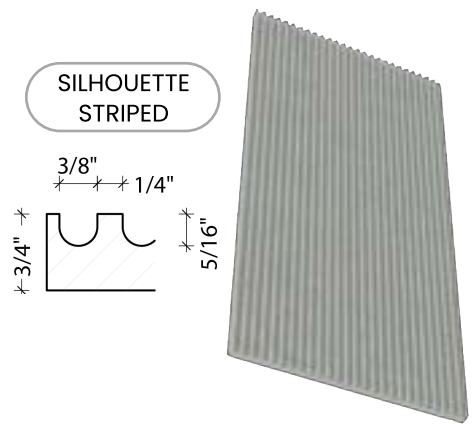

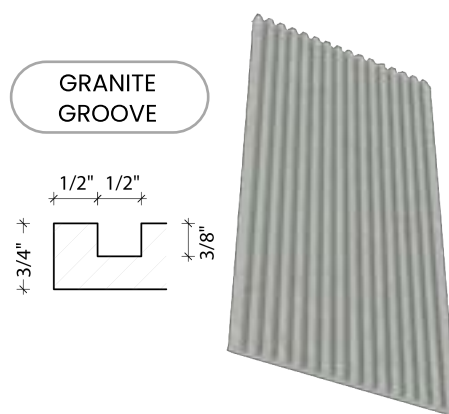

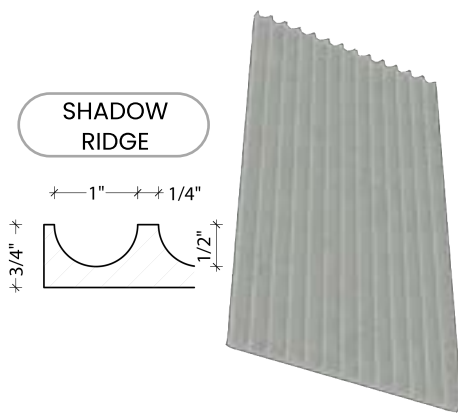

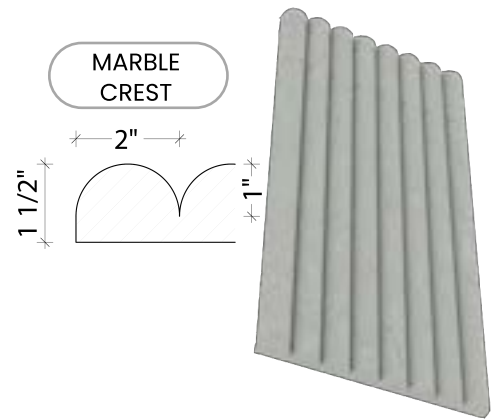

ARCHITECTURAL USE - INTERIOR & EXTERIOR

- Feature Walls
- Fireplace

NATURAL STONE COLLECTION

Discover the timeless elegance of our Natural Stone Collection. Crafted with precision and inspired by nature's beauty, each piece in this collection embodies authenticity and sophistication. From rich textures to earthy tones, our precast stone manufacturing ensures quality and durability, bringing the beauty of natural stone into your space with effortless style.

NATURE'S CHARMED TOUCH

Natural stone, renowned for its timeless elegance and durability, has been a staple in architectural design for centuries. Its versatility and unique textures allow architects to enhance both interior and exterior spaces, while its sustainability and low maintenance needs make it an environmentally friendly and cost-effective choice. Whether used for grand facades, luxurious countertops, or elegant flooring, natural stone adds enduring beauty and value to any project.

CAST STONE COLLECTION

Celebrate classic sophistication with our Cast Stone Collection. Meticulously crafted through advanced techniques, each piece exudes timeless charm and enduring quality. From sleek lines to intricate details, our cast stone offerings bring architectural elegance to any project. Explore the versatility and durability of cast stone, elevating your design with a touch of refinement and tradition.

STONE'S LEGACY, CAST IN ART

Cast stone is a versatile and durable material that mimics the look of natural stone at a lower cost. Ideal for facades, columns, and decorative elements, it offers the beauty of natural stone with enhanced strength and uniformity, making it a popular choice for modern construction.

STONE TRANSITIONS

The beauty of the stone. Ease of siding. Our stone clad siding products from Stone Transitions® offer the authentic appeal of traditional masonry through a modern installation method. Whether your project is inside or outside, renovation or new construction, our stone panel products are the perfect finish.

Watertable/Sills, Window/Door Trim, Wall/Pier Caps & Fireplace Solutions

STONE TRANSITIONS®

...Simply Better

Finish your project with our architectural masterpieces, which are specially created to satisfy all your desires. Today we remain the pioneers and perfectionists who earned us a reputation as a leading manufacturer of stone veneers over 50 years ago.

COLORS

We have identified the presence of common color hues and tones found throughout hundreds of manufactured and natural stone veneers. From this, we created our comprehensive range of color choices designed to complement and enhance all stone, brick, stucco or other cladding finishes.

While StoneTransitions® offers the most comprehensive selection of colors, there are a few factors that impact a color's appearance including the following:

Surface Texture

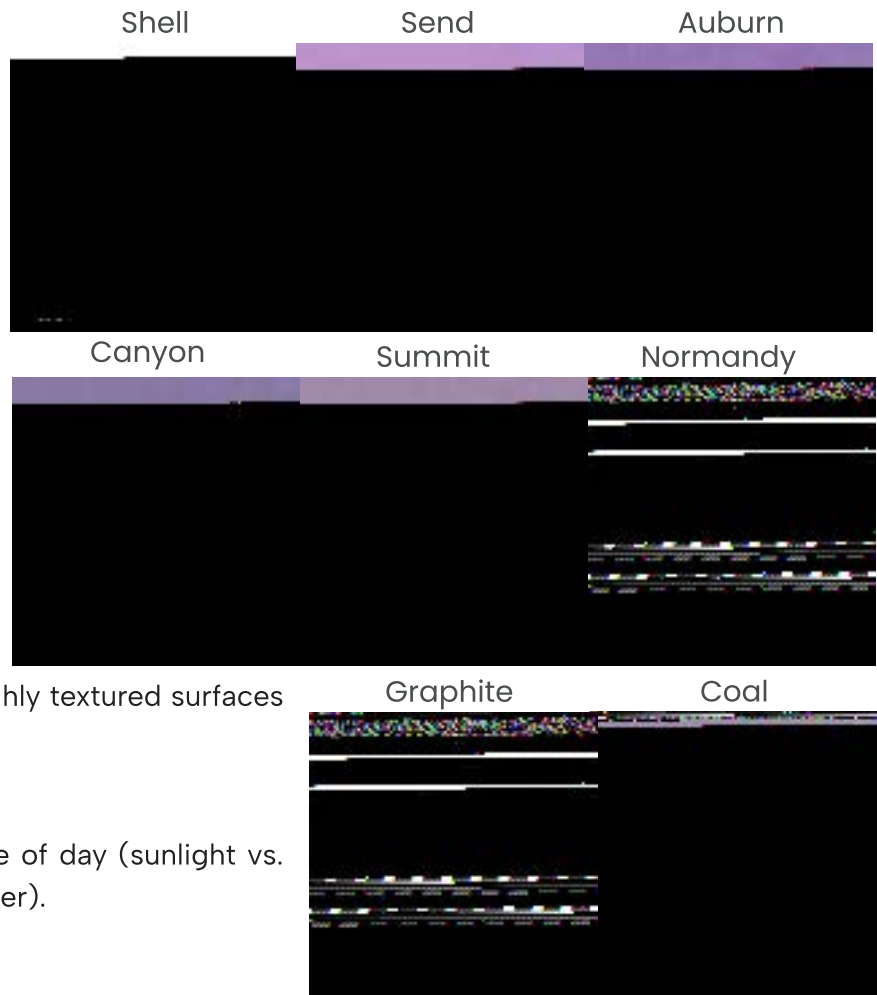

Smooth surfaces appear lighter, while highly textured surfaces appear darker.

Lighting

Type of lighting (inside vs. outside), time of day (sunlight vs. shade) and time of year (summer vs. winter).

Viewing Position & Conditions

Flat vs. vertical, close vs. distant and damp vs. dry.
